## Old Meets New

Being on the Illinois-Iowa border, it has always been a challenge to cross from one state to another. Both sides are equally busy with manufacturing and a growing population. In 1935 the first suspension bridge was built between Moline, IL and Bettendorf, IA. It was the 'talk of the towns' but by 1958 a second almost identical span was needed and built. That made it 4 lanes, but no breakdown lanes on either span. If an accident occurred, traffic backed up for a very long time. Enter the Interstate designation and traffic increased dramatically. Now we are celebrating the new and much improved twin basket styled Interstate 74 Bridges, 4 lanes each and breakdown lanes on each side. Although the suspension bridges served their purposes well, our residents are enjoying the ease of travel. As more vehicles become 25 years or older, our participation base grows, and we see the progression of vehicle development through the years.

To help us celebrate, the US Postal Service is including our great bridges on a Postage Stamp later this year.

Be sure to be back for the Ice Cream Sundae Bar.
